

DMITRII ZHUKOV

Narrative Designer & Game Writer

Location: Belgrade, Serbia // Email: storiesbydz@gmail.com
Telegram: @moneywrapping // Phone: +44 7442 896202

// PROFILE

Narrative Designer and Game Writer with 10+ years of professional writing experience, including eight years leading documentation for enterprise fintech software. Published novelist (*Myst*) and creator of **STATIC**: a complete detective-horror video game narrative project. I build worlds from the ground up, embedding story into every layer of the experience through environmental storytelling, collectibles, documents, clues, and interactive objects. Proficient in writing dialogue, designing branching narratives and player choices, and creating complex narrative systems that react to player decisions. Skilled at integrating AI-driven workflows into the writing pipeline to accelerate content creation while maintaining narrative consistency.

// SELECTED PROJECT: STATIC

Narrative Designer, Writer & Developer: solo project 2025 — PRESENT
Mystery-horror adventure set in the coastal town of Mag Point.

- ▶ **Designed the narrative systems end-to-end:** a JSON-driven branching dialogue engine with flag-based state, conditional text variants, gated choices, and a playable scene resolving into four distinct endings.
- ▶ **Architected choice and consequence structure:** mapping player knowledge to unlockable dialogue paths, balancing pacing, reveal order, and replay value across branches.
- ▶ **Authored full character dossiers:** biographies, voice guides, contextual bark sets with trigger conditions; documentation built for a development team.
- ▶ **Wrote screenplay-format scenes:** cross-linked to their interactive counterparts to show the full script-to-implementation workflow.
- ▶ **Built an environmental storytelling layer:** in-world documents, evidence archives, forum threads, collectible artifacts, and items that deliver narrative through discovery.
- ▶ **Developed the entire presentation platform:** Astro, Tailwind, MDX, Git.

// PROFESSIONAL EXPERIENCE (FINTECH)

Senior Technical Writer & Team Lead: Hazeltree, Bournemouth, UK FEB 2018 — JAN 2026

- ▶ Built and led the documentation function for enterprise treasury-management software: **200+ guides across 18 product modules**, maintained as one internally consistent body of work (Knowledge Base).
- ▶ Launched an OpenAPI developer portal (70+ endpoints) and docs-as-code workflows. Reduced client support workload by ~30%. Increased documentation usability by ~90%.
- ▶ Owned quarterly release cycles end-to-end, shipping content in lockstep with product releases; hired and managed writers, defined voice, standards, and review workflows.

Earlier roles: ETNA Trader · Intermedia Inc., Saint Petersburg, Russia 2012 — 2018
Implementation, database and technical support roles in fintech and hosted infrastructure; SQL and ETL scripting, enterprise client onboarding, internal and customer-facing knowledge bases.

// SKILLS & EXPERTISE

NARRATIVE DESIGN	branching & systemic dialogue · choice architecture & flag/state design · narrative pacing & reveal structure · barks and reactive VO · environmental storytelling · worldbuilding
WRITING	screenplay format · character voice development · in-world documents & found text · narrative documentation (character bibles, story bibles, style guides) · UX copy
TOOLS & TECH	articy:draft · Twine · JSON dialogue pipelines · Git/GitHub · Markdown/MDX · Astro · Python · Figma · Photoshop · Claude/ChatGPT/Gemini/Copilot
LANGUAGES	English (C1) · Russian (native) · Ukrainian (advanced) · German (B2) · Serbian (B1)

// EDUCATION

Specialist Degree, Information Systems Engineering
St. Petersburg State University of Engineering & Economics

2008 – 2013

Exchange Program, Computer Science & Mathematics
HTW Dresden, Germany

2010 – 2011
